

Welcome to the NEW KNME Schedule module. This new module provides an easy to use schedule grid and a wide variety of new tools.

Note that the new module scrolls left and right (horizontally) where the old module scrolled up and down (vertically). You have several options to navigate through the listings shown on the module.

» Use the date selector to change the date and time. Be sure to click GO to request your change.

» Use the links above the grid to move “Earlier” “Later” “Now” or “Primetime”

HELP | PRINT

The default for programming is DIGITAL-OVER-THE-AIR. If you receive your signal via satellite or cable, you can change the PROVIDER.

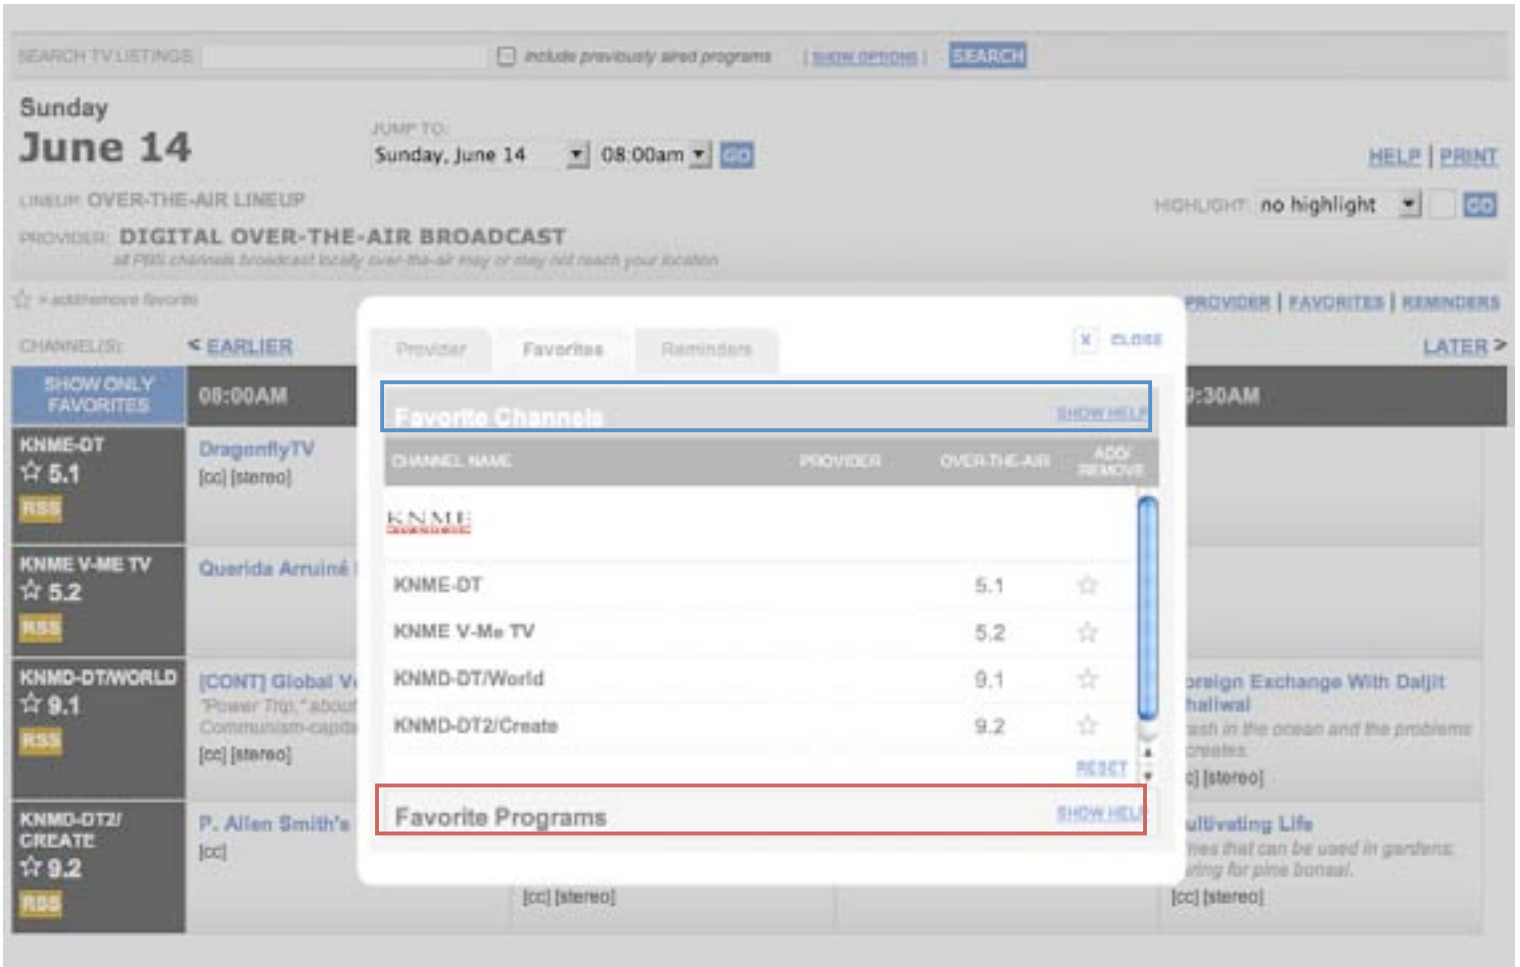

Be sure to click SAVE after selecting your provider.

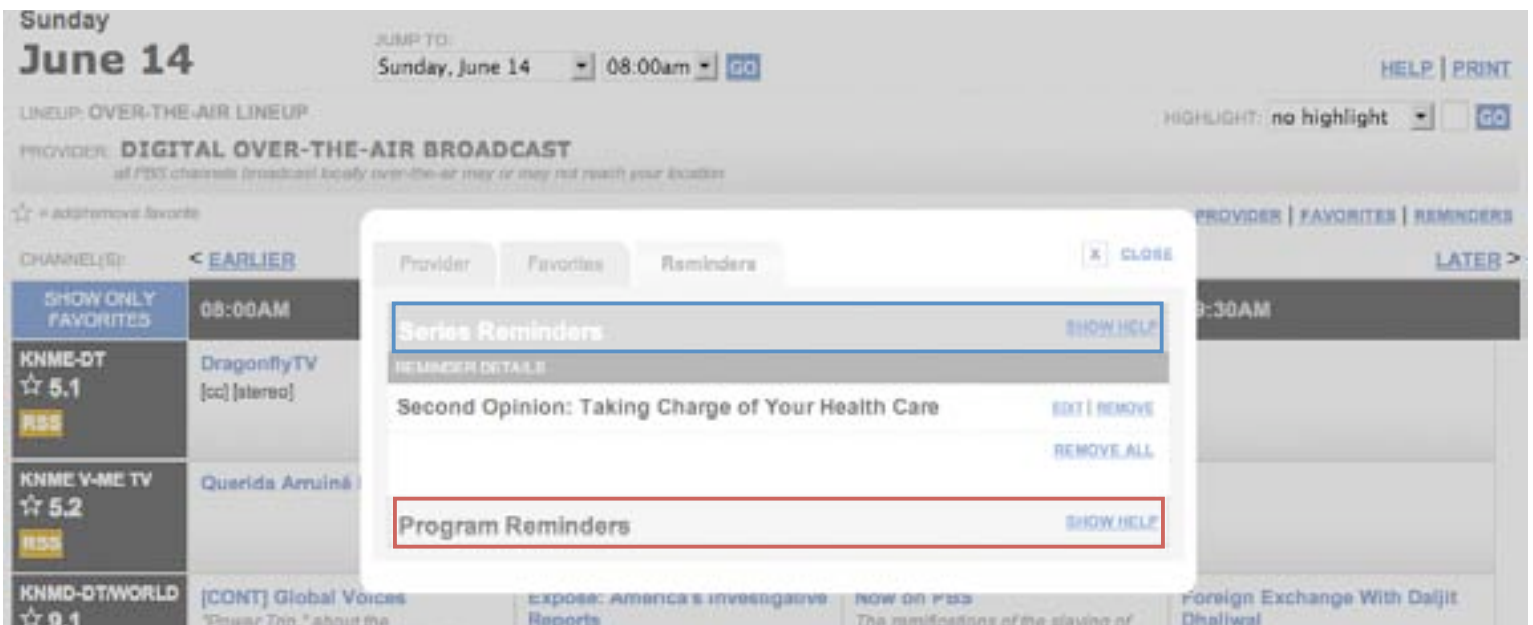

Safari browser users will not see the PROVIDER | FAVORITES | REMINDER links.

When viewing FAVORITES note that there are separate two areas; one for **Channels**, one for **Programs**. Clicking on “Favorites Channels” shows the selected channels. Clicking on “Favorite Programs” shows the programs. The areas are shown individually and not at the same time.

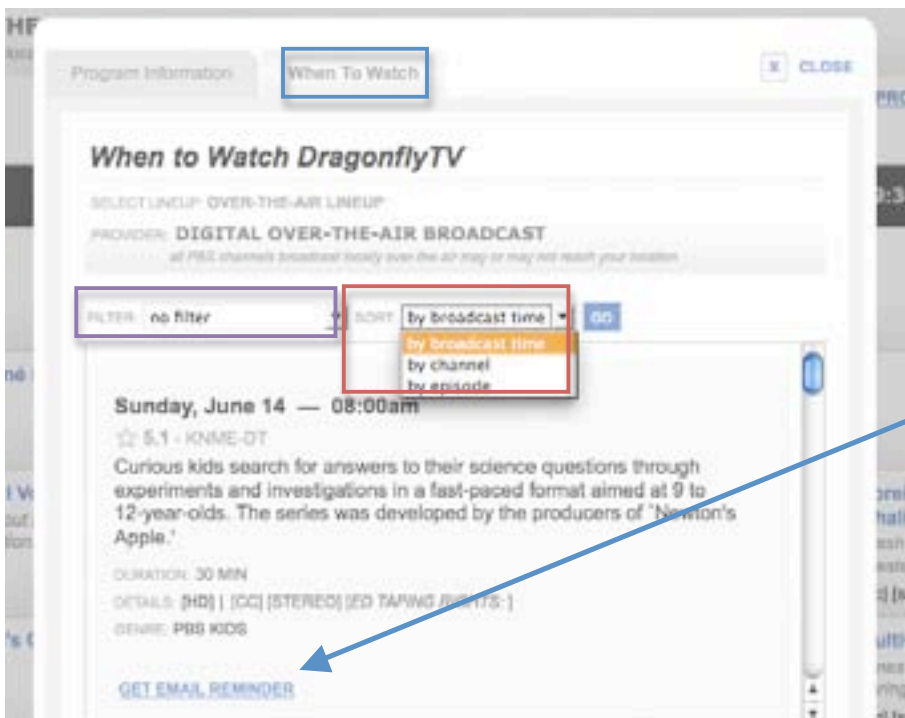

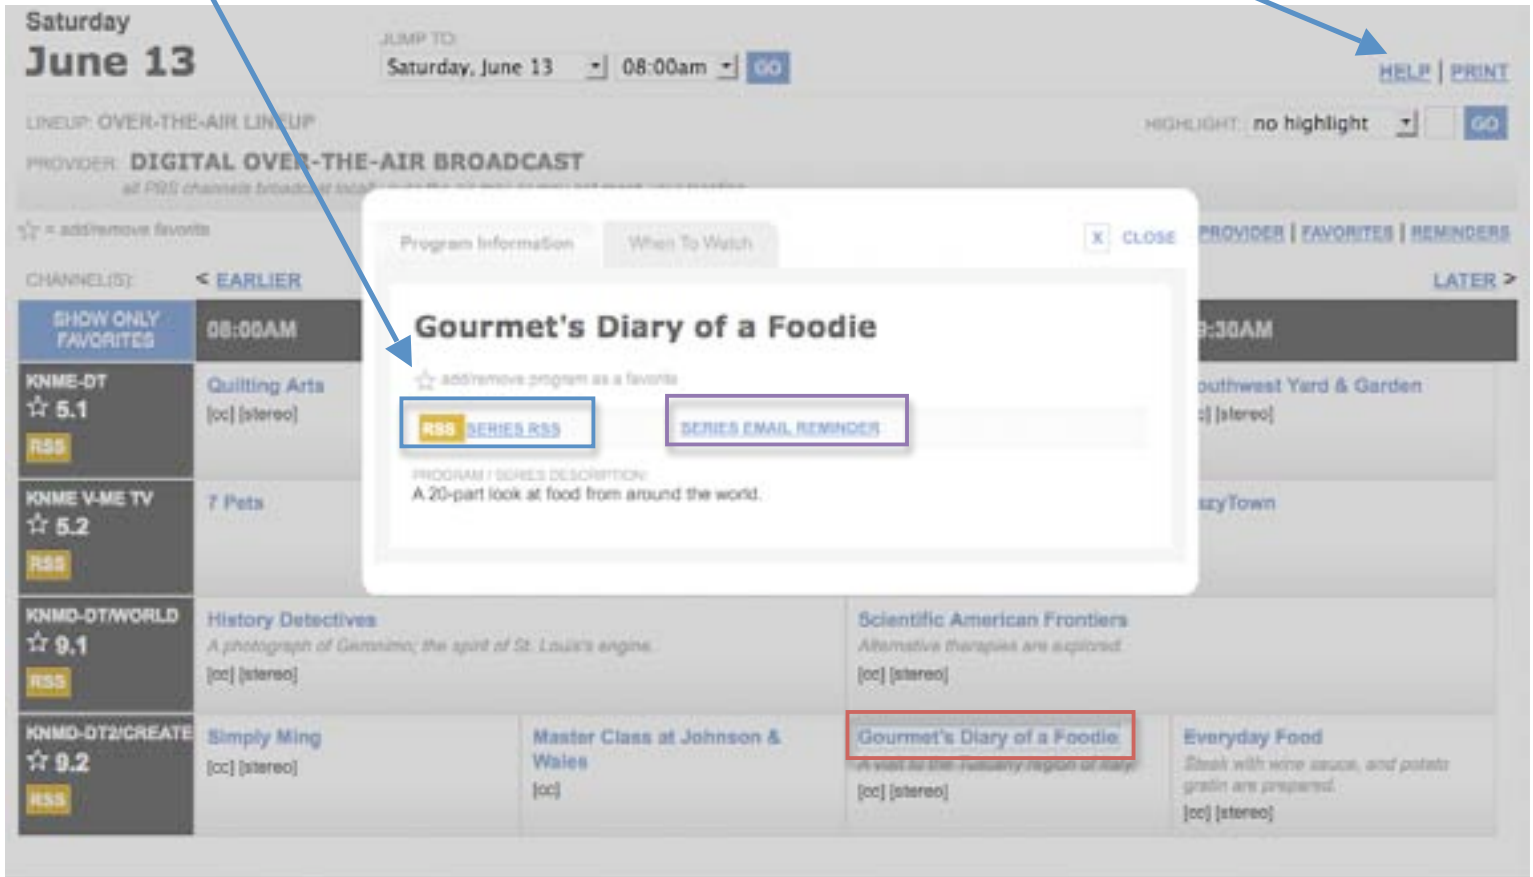

REMINDERS are displayed in a similar manner, with separate sections for **Series** and **Programs**.

To view more information on a particular program, click the **program name**. This will bring up a detailed Program Box.

This Program Box includes links to **SERIES RSS** and **SERIES EMAIL REMINDER**. These links can be used to keep you up-to-date on your favorite shows. For more information on RSS, use the **HELP** link in the right corner.

You can also add this series as one of your favorites by clicking on the star.

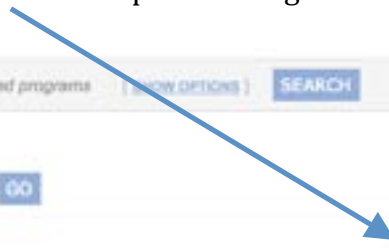

You can also use the Program Box to view additional showings of the selected program.

Click the **When to Watch** tab and you can **FILTER** to show only your favorite channel listings and change the **SORT** order.

You can also sign-up to receive **EMAIL REMINDERS** of specific showings.

To make it easier to find programs, you can add HIGHLIGHTs to specific categories of shows.
